

ABOUT EUCHEMS

Based in Brussels, Belgium, EuChemS is an umbrella organisation representing Chemical Societies and related organisations from over 30 different countries. We speak for Chemistry at the European level to inform decision-makers in their policymaking work, and help foster a community of chemists through events, networking opportunities and other projects and activities.

Network! www.eycn.eu

ANYTIME IS **E-LEARNING** TIME

EuChemS, the European Chemical Society, offers two online courses on its Moodle platform.

▶ **Good Chemistry –
Methodological, Ethical
and Social Implications**

▶ **What and where to study
in the EU**

You learn when you want. These e-courses are designed by University teachers and experts for students wishing to develop their skills and awareness in EU and chemistry matters.

Good Chemistry – Methodological, Ethical and Social Implications

Are you a student who wants to become more productive in daily research or a faculty member who wishes your students to maintain high scientific integrity?

This e-course aims to contribute to an integral education of students as important future enactors of progress and influential decision-makers in academia, industry, and public. Its content relates to science conduct, logic and theory of science, experimentation, professional and public communication of science, risk and uncertainty, sustainability, and social impact of chemical activity.

You will find in the 16 sessions video lectures, case discussions, reading assignments and quizzes.

For registration, please check www.elearning-euchems.eu. For more information, please contact us at secretariat@euchems.eu.

Teachers

Jan Mehlich
National Chung Hsing University

Iwona Maciejowska
Jagiellonian University, Chemistry Education

What and where to study in the EU

With its 4.5 million km², studying opportunities are almost infinite. This e-course “EU infrastructures matter” aims to provide guidance and serve as a navigation tool through the global maze when it comes to education, research and services in the EU. The course was developed within UNESCO programme “Open Education for a Better World” #OE4BW.

It promotes common values, inclusive education and the European dimension of studying and teaching.

Three sessions will guide you to find the right education program for you.

For registration, please check www.elearning-euchems.eu. For more information, please contact us at secretariat@euchems.eu.

Teachers

Nineta Hrastelj
EuChemS, Secretary General

Špela Majcen Marušič
MA in International, Relations and Diplomacy of the EU from the College of Europe
